

CREATION MOMENTS

Proclaiming Evidence for Truth

THIS WEEK'S CREATION MOMENT

Evolution – A Matter of Faith

All things were made by him; and without him was not any thing made that was made. In him was life; and the life was the light of men. – John 1:3-4

Does the name Harold Clayton Urey ring a bell? Urey was an American physical chemist who did pioneering work on isotopes, earning him the Nobel Prize in Chemistry for discovering deuterium. He also played a significant role in the development of the atom bomb. Still no bell? Well, perhaps you'll recognize his name if I mention the Miller-Urey experiment, conducted in 1952.

In that famous experiment, a mixture of ammonia, methane, hydrogen and water was exposed to electric sparks to simulate lightning. The mixture ended up producing some amino acids – the building blocks of life – but many news outlets mistakenly reported that Harold Urey and Stanley Miller had created life in the lab. Though Urey's name is still known and revered by evolutionists, how many of them know where Harold Urey ended up in his views on the origin of life? Listen carefully to what he told the *Christian Science Monitor* ten years after the Miller-Urey experiment:

"All of us who study the origin of life find that the more we look into it, the more we feel that it is *too complex to have evolved anywhere*." He went on to say he "believes as an *article of faith* that life evolved from dead matter on this planet." An article of *faith*, not *science*!

And that is exactly what evolution really is – a faith that denies both the Bible and the most fundamental laws of science.
