

CREATION MOMENTS

Proclaiming Evidence for Truth

THIS WEEK'S CREATION MOMENT

Faith: Christ or Man?

And I will set up shepherds over them which shall feed them: and they shall fear no more, nor be dismayed, neither shall they be lacking, saith the LORD. – Jeremiah 23:4

How certain are evolutionists of evolution? Of course, no believer in evolution is going to go on national television and say that he is not sure of evolution. However, within the scientific community, those who really know the facts don't always sound so convinced of their arguments.

The great philosopher of science, Dr. Karl Popper, wrote that Darwinism is not even a scientific theory because it cannot be tested. Even the prestigious British Museum of Natural History offered this admission on one of its displays. That admission, by the way, created a scandal among American evolutionists. Dr. Colin Patterson, head of paleontology at the British Museum, was responsible for this display. He wrote in his book *Evolution* that evolution is simply a metaphysical system used to arrange scientific evidence. It is not a conclusion of science at all.

Even evolutionists Stephen J. Gould and Niles Eldredge recognized that the fossil record shows that creatures appeared suddenly and fully formed – without any ancestors. However, they claim that these were lucky jumps of evolution.

Our conclusion must be that even the experts, in moments of honesty – when they know they won't be quoted in the press – admit that evolution is no more than a faith. Creationists will report what the press does not. Evolution is truly a faith. We have a faith, too. But our faith has been revealed by God in the Bible!
