

CREATION MOMENTS

Proclaiming Evidence for Truth

THIS WEEK'S CREATION MOMENT

IPCC Climate Change Report Refuted

And Jesus answered and said unto them, Take heed that no man deceive you. – Matthew 24:4

On a previous broadcast, we told you about an IPCC report designed to frighten people with dire warnings about the destruction of our planet if the world's governments don't take serious measures now to combat man-made global warming.

On the same day that the IPCC released its report, another report was released that you probably haven't heard about. The 1,068-page report was produced by the Nongovernmental International Panel on Climate Change, a group founded in 2003 by distinguished atmospheric physicist S. Fred Singer. The report looks at each claim made in the IPCC report and refutes it, using real climate data that was ignored or misrepresented by the IPCC.

Joseph L. Bast, publisher of the Climate Change Reconsidered series, wrote: "We know the authors of the IPCC's reports have financial conflicts of interest, since the government bureaucracies that select them and the UN that oversees and edits the final reports stand to profit from public alarm over the possibility that global warming will be harmful."

Creation Moments sees many parallels between climate change and evolution. Both are fueled by financial gain and faulty worldviews. When you remove all the smoke, mirrors and shoddy science, both are intended to deceive. Thankfully, God has given His people eyes that can detect lies.
