

CREATION MOMENTS

Proclaiming Evidence for Truth

THIS WEEK'S CREATION MOMENT

Looking for Life in All the Wrong Places

And ye shall seek me, and find me, when ye shall search for me with all your heart. – Jeremiah 29:13

Several years ago I read a short story about three friends sitting around a campfire discussing whether life on other planets would ever be found. Two of them believe there is life on other planets, but one disagrees. He insists that God created life on their planet alone. As the conversation continues, one of them sees that the fire is dying out, so he stirs the smoldering embers with a stick he is holding in his *third green tentacle!*

Yes, I enjoy science-fiction stories! But as a creationist and Bible-believing Christian, I have my feet planted solidly on God's Word. Since the Bible does not teach that extraterrestrial life exists, neither do I.

Nevertheless, NASA recently announced they will be launching new space telescopes to look for planets capable of supporting life. According to *ScienceNews*, the first to be launched is NASA's Transiting Exoplanet Survey Satellite, or TESS. The second is the James Webb Space Telescope.

"With their powers combined," *ScienceNews* said, "TESS and James Webb could identify nearby planets that are good candidates for life. These worlds will probably be quite different from Earth – they'll be a bit larger and orbit faint, red suns – but some researchers hope that a few will offer hints of alien biology."

Creation Moments predicts they won't find what they are looking for. If scientists would only turn to searching for the *Creator* of life, they would find Him!
